

*If you care about your appearance,
your comfort and safety,
if you value professionalism...*

*If you expect more than others
we welcome You*

VILLA NOVA DENTAL CLINIC

Recently opened in Warsaw, Villa Nova Dental Clinic is one of the most modern dental offices in Europe.

The Clinic is located at 3 Marconich Street in a quiet, elegant and secure neighbourhood in Wilanów district.

The clinic provides professional ultramodern services, based on world-class diagnostic, preventive and therapeutic technology. The equipment used by our dentists – including a state-of-the-art Carl Zeiss endodontic microscope and a Spectroshade spectrophotometer enabling a perfect match of colours – is the most modern in Poland. The Clinic offers a modern painkilling method with the use of a computer-controlled administration of anaesthetic drugs. As a result treatments in the Clinic can be absolutely painless.

By combining state-of-the-art technologies with a team of specialists with excellent medical and scientific achievements to their credit, the Clinic guarantees comprehensive dental services of the highest quality.

Patients, from the youngest to the oldest ones, are offered a full range of professional services in the area of restorative dentistry, aesthetic dentistry, endodontics, microscopic endodontics, orthodontics, child dentistry, preventive dentistry, periodontics, X-ray diagnostics, dental surgery, implantology and prosthetics.

All this enables Villa Nova Dental Clinic to offer its patients, even the so-called difficult cases, comprehensive dental treatments in one place. This is possible because the Clinic's dentists cooperate with each other, work in a team and specialise in different fields of dentistry.

The Clinic's priority is to provide comprehensive treatment services to its patients, even those most demanding.

The second most important goal is aesthetic dentistry, which deals with correcting the shape and colour of teeth and anything that can change the appearance of the mouth to make it visually pleasing. Porcelain and composite materials of the latest generations are applied to teeth to achieve the Hollywood Smile effect.

In Poland, there are only several dentists specialised in aesthetic dentistry. Villa Nova Dental Clinic employs dentists who have excellent achievements in this field. Some of them have been trained by the world's most outstanding specialists.

Our patients wait for consultations in elegant and cosy interiors, listening to soothing music which helps them fully relax and forget about the stress associated with the dental appointment.

The Villa Nova to Children Foundation operates at the Clinic to provide comprehensive dental care to children from several orphanages.

A training centre will soon be set up at Villa Nova Dental Clinic. It will be offering training and advanced courses to dentists working at our and other clinics with the participation of the most outstanding specialists from across the world.

VILLA NOVA DENTAL CLINIC

One of the most modern dental clinics in Europe has just been opened in Warsaw. The Villa Nova Dental Clinic is situated at 3 Marconich Street in the quiet, elegant and secure district of Wilanów.

Villa Nova Dental Clinic offers patients - from the youngest to the oldest - a comprehensive dental treatment covering conservative and aesthetic dentistry, endodontic care and microscopic endodontics as well as orthodontics, paedodontics, prophylactics, periodontology, roentgenodiagnosics, dental surgery, implantology and prosthetics.

Dental clinics' suppliers consider the Villa Nova Clinic one of the most modern clinics in Poland. It is also regarded as one of the Europe's 16 best clinics in terms of most advanced equipment and materials. Most of the equipment has been imported and some of the appliances are the unique in Poland. The clinic is an exemplary centre of its kind and its premises are used for staff training by Polish and foreign lecturers. Most outstanding specialists from throughout the world are involved in courses run in the clinic.

Dentists working in the Villa Nova Dental Clinic are specialists with considerable scientific achievements to their credit as well as extensive practical and medical experience. They raise their qualifications consistently by attending numerous training courses, conferences and scientific symposia. That bears on the service quality and treatment methods in the clinic. The most modern equipment available in Poland includes the latest generation Carl Zeiss endodontic microscope which helps to save teeth that would be removed in any other

clinic and the SpectroShade spectrophotometer for achieving a perfect colour match.

This new clinic specialises in aesthetic dentistry in the wide meaning of that word. The staff includes an aesthetic dentistry specialist who is a member of the Aesthetic Dentistry Association affiliating only 30 such experts in the country. The Villa Nova Dental Clinic achieves spectacular results in porcelain facing which most of the dental centres in Poland refrain from doing because the procedure is difficult and complex. An ideal facing, that is an aesthetic reconstruction of the front teeth surface, demands professionalism and the highest skills. The results in Villa Nova in this respect are impressive. That also applies to the Hollywood smile effect offered to patients.

The wide range aesthetic dentistry services provided in the Villa Nova covers implants and teeth whitening, prophylactics and orthodontic treatment. We offer full aesthetics services and do our best to ensure ideal results.

The staff at Villa Nova Dental Clinic sees to it that patients wait for their turn in comfort. The interiors are comfortable and elegant and the quiet music seeping through relaxes and eliminates stress. Patients who cannot stop working even in the dentist's waiting room can avail themselves of wireless Internet link.

In pursuit of its pro-health activities, the clinic has also set up the Villa Nova for Children Foundation which provides comprehensive dental care to children from several orphanages.
